

TLS DISTANCE EDUCATION

Flexible delivery of distance education

TLS DISTANCE EDUCATION helps you to flexibly deliver your education products on the Web or via CD ROM/DVD.

With TLS DISTANCE EDUCATION your students can be with their educators - virtually. Don't ask students to read because they won't. Have your trainers talk to them as they would if they are in the classroom. Point things out to them, guide them, interact with them, educate and train them.

Images and text alone are poor substitutes for good educators. Distance education needs a better solution. This requires a different approach - a sophisticated blending of synchronised media in concert with intelligent navigation. TLS DISTANCE EDUCATION facilitates such blending and supports such navigation. Let your students experience the excitement of your best teachers and in return get the best education they can.

A simple list of topics to be covered

Yvonne Boag

This work, painted 1993 is call Eglise Jeanne d'Arc. It is painted from Yvonne's studio window while she was in Paris and you can see the repeated motive of the church but also another motive which occurs frequently in Yvonne's work which she calls her cloud.

TLS DISTANCE EDUCATION enables you to:

- Deliver an education and training experience on the Web or CD ROM/DVD using methods we know already work best - face to face;
- Provide flexible access to your education portfolio from many perspectives;
- Value-add existing educational material through intelligent links between related items;
- Make better use of existing educational material by re-purposing;
- Easily and cheaply add new educational material into your portfolio;
- Extend the useful life of existing educational material by making it more easily accessible.
