

TLS ELECTRONIC COMMERCE

Facilitating electronic advertising

TLS ELECTRONIC COMMERCE helps you with your advertising on the Web.

With TLS ELECTRONIC COMMERCE you can be with your customers - virtually. Don't ask them to read because they won't. Talk to them as you would if they were in the same room. Point things out to them, guide them, interact with them, sell them.

Images, text and banner ads are poor in conveying your products across the Web, you need a better solution. This requires a different approach - sophisticated blending of disparate media in concert with intelligent navigation. TLS ELECTRONIC COMMERCE facilitates such blending and supports such navigation. Let your customers explore your products at their own speed and in their own way and get real value for your advertising dollar.

TLS ELECTRONIC COMMERCE enables an you to:

- Advertise on the Web using methods we know already work - face to face
- Provide flexible access to your product information from many perspectives;
- Value-add existing information through intelligent links between related items of information;
- Make more use of existing information by re-purposing;
- Provide a flexible network of access points to your information in preference to, but parallel with, searching technologies;
- Incorporate new information without recourse to expensive editing of existing information;
- Provide subsets of existing information without expensive editing or duplication of such information;
- Extend the useful life of existing information by making it more easily found;
